Kenji Watanabe

kenji.watanabe@example.com | +1 555 010 1002

Professional Profile

Backend engineer focused on reliable, well-tested services.

Work Experience

Software Engineer, Brightline Labs, 2020 - 2024

Reduced API error rate by 25% after a queue redesign

Led migration of 8 services to a shared auth library

Project 1: led a team of 4 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 6%.

Project 2: led a team of 5 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 7%.

Project 3: led a team of 6 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 8%.

Project 4: led a team of 7 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 9%.

Project 5: led a team of 3 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 10%.

Project 6: led a team of 4 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 11%.

Project 7: led a team of 5 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 12%.

Project 8: led a team of 6 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 13%.

Project 9: led a team of 7 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 14%.

Project 10: led a team of 3 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 15%.

Project 11: led a team of 4 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 16%.

Project 12: led a team of 5 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 17%.

Project 13: led a team of 6 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 18%.

Project 14: led a team of 7 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 19%.

Project 15: led a team of 3 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 20%.

Project 16: led a team of 4 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 21%.

Project 17: led a team of 5 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 22%.

Project 18: led a team of 6 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 23%.

Project 19: led a team of 7 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 24%.

Project 20: led a team of 3 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 5%.

Project 21: led a team of 4 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 6%.

Project 22: led a team of 5 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 7%.

Project 23: led a team of 6 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 8%.

Project 24: led a team of 7 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 9%.

Project 25: led a team of 3 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 10%.

Project 26: led a team of 4 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 11%.

Project 27: led a team of 5 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 12%.

Project 28: led a team of 6 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 13%.

Project 29: led a team of 7 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 14%.

Project 30: led a team of 3 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 15%.

Project 31: led a team of 4 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 16%.

Project 32: led a team of 5 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 17%.

Project 33: led a team of 6 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 18%.

Project 34: led a team of 7 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 19%.

Project 35: led a team of 3 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 20%.

Project 36: led a team of 4 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 21%.

Project 37: led a team of 5 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 22%.

Project 38: led a team of 6 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 23%.

Project 39: led a team of 7 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 24%.

Project 40: led a team of 3 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 5%.

Project 41: led a team of 4 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 6%.

Project 42: led a team of 5 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 7%.

Project 43: led a team of 6 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 8%.

Project 44: led a team of 7 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 9%.

Project 45: led a team of 3 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 10%.

Project 46: led a team of 4 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 11%.

Project 47: led a team of 5 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 12%.

Project 48: led a team of 6 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 13%.

Project 49: led a team of 7 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 14%.

Project 50: led a team of 3 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 15%.

Project 51: led a team of 4 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 16%.

Project 52: led a team of 5 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 17%.

Project 53: led a team of 6 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 18%.

Project 54: led a team of 7 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 19%.

Project 55: led a team of 3 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 20%.

Project 56: led a team of 4 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 21%.

Project 57: led a team of 5 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 22%.

Project 58: led a team of 6 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 23%.

Project 59: led a team of 7 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 24%.

Project 60: led a team of 3 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 5%.

Project 61: led a team of 4 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 6%.

Project 62: led a team of 5 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 7%.

Project 63: led a team of 6 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 8%.

Project 64: led a team of 7 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 9%.

Project 65: led a team of 3 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 10%.

Project 66: led a team of 4 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 11%.

Project 67: led a team of 5 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 12%.

Project 68: led a team of 6 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 13%.

Project 69: led a team of 7 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 14%.

Project 70: led a team of 3 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 15%.

Project 71: led a team of 4 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 16%.

Project 72: led a team of 5 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 17%.

Project 73: led a team of 6 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 18%.

Project 74: led a team of 7 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 19%.

Project 75: led a team of 3 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 20%.

Project 76: led a team of 4 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 21%.

Project 77: led a team of 5 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 22%.

Project 78: led a team of 6 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 23%.

Project 79: led a team of 7 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 24%.

Project 80: led a team of 3 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 5%.

Project 81: led a team of 4 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 6%.

Project 82: led a team of 5 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 7%.

Project 83: led a team of 6 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 8%.

Project 84: led a team of 7 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 9%.

Project 85: led a team of 3 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 10%.

Project 86: led a team of 4 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 11%.

Project 87: led a team of 5 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 12%.

Project 88: led a team of 6 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 13%.

Project 89: led a team of 7 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 14%.

Project 90: led a team of 3 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 15%.

Project 91: led a team of 4 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 16%.

Project 92: led a team of 5 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 17%.

Project 93: led a team of 6 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 18%.

Project 94: led a team of 7 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 19%.

Project 95: led a team of 3 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 20%.

Project 96: led a team of 4 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 21%.

Project 97: led a team of 5 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 22%.

Project 98: led a team of 6 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 23%.

Project 99: led a team of 7 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 24%.

Project 100: led a team of 3 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 5%.

Project 101: led a team of 4 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 6%.

Project 102: led a team of 5 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 7%.

Project 103: led a team of 6 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 8%.

Project 104: led a team of 7 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 9%.

Project 105: led a team of 3 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 10%.

Project 106: led a team of 4 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 11%.

Project 107: led a team of 5 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 12%.

Project 108: led a team of 6 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 13%.

Project 109: led a team of 7 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 14%.

Project 110: led a team of 3 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 15%.

Project 111: led a team of 4 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 16%.

Project 112: led a team of 5 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 17%.

Project 113: led a team of 6 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 18%.

Project 114: led a team of 7 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 19%.

Project 115: led a team of 3 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 20%.

Project 116: led a team of 4 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 21%.

Project 117: led a team of 5 to deliver a data pipeline for a regional client, finishing 2 weeks ahead of schedule and cutting running costs by 22%.

Project 118: led a team of 6 to deliver a customer portal for a regional client, finishing 3 weeks ahead of schedule and cutting running costs by 23%.

Project 119: led a team of 7 to deliver a forecasting model for a regional client, finishing 4 weeks ahead of schedule and cutting running costs by 24%.

Project 120: led a team of 3 to deliver a reporting dashboard for a regional client, finishing 1 weeks ahead of schedule and cutting running costs by 5%.

Academic Background

BSc Computer Science, Cedar Tech Institute, 2016 - 2020

Technical Skills

Python, Go, PostgreSQL, Docker, Kubernetes, CI/CD, REST APIs
